PROFILE

I always aspired to groom myself as a Logistics/Supply Chain Professional with a focus of strong customer satisfaction. Live a challenging and rewarding career in Logistics/Supply Chain, Inventory Management, Dispatches and specialization in Materials Management with 15+ years' experience in Logistics/Warehousing Management. Demonstrated skills in Warehousing for attaining management goals and objectives

WORK EXPERIENCE

Senior Manager

Ulink Agritech Private Limted (Agrostar)

2015-Till Date

- Oversee daily workloads and manage work capacity to ensure timely completion of tasks. Supervise inbound material stock-in and outbound material dispatches with accurate documentation and data maintenance.
- Monitor operator attendance and manpower deployment. Plan and organize daily work, conduct opening and closing meetings, and coordinate with relevant departments to resolve issues. Maintain proper housekeeping on the line and support subordinates in achieving targets. Streamline material processes for efficient line feeding.
- Manage inventory and conduct periodic stock checks, analyzing variances. Oversee inbound and outbound logistics effectively.
- Foster teamwork and motivate team members. Ensure proper visualization of materials on the line, assist and motivate employees to supply materials on time, and monitor timely supply to the production line to ensure optimal productivity and continuous improvement. Prepare and adhere to necessary daily reports.
- Define and manage layout and packing line storage systems in coordination with the Technology Department. Ensure adherence to procedures, processes, guidelines, and instructions. Control operator overtime and minimize production losses due to logistics.
- Oversee outward logistics and finished goods packaging. Plan efficient storage within the warehouse to optimize space and throughput capacity.
- Manage transportation, select transporters, and finalize transport rates. Implement customer plans and adhere to requirements to achieve customer satisfaction.
- Monitor and manage warehouse operations performance, control warehousing processes, and study existing processes to enhance delivery efficiency and implement new procedures.
- Generate daily and weekly reports for accounting and documentation purposes. Maintain reverse logistics and ensure proper housekeeping and order within the department. Work on continuous improvement to enhance productivity and reduce waste. Ensure stock receipt is checked, verified, and processed promptly, with vouchers forwarded to the accounts department.
- Control warehousing, optimize quantities across different variants, and coordinate with the Line Manager to organize line workload and staffing based on product priority.
- Ensure smooth operational activities, inform and instruct employees of deviations or changes, and address employee problems, concerns, and recommendations promptly.
- Strive for continuous improvement in all areas of responsibility. Maximize employee output, dedication, and job satisfaction.

EXPERTISE

- **Warehousing Management:** Proficient in all aspects of warehouse operations, including inventory management, order fulfillment, and space optimization. Skilled in implementing efficient storage systems to maximize warehouse capacity and streamline workflows.
- **Logistics Coordination:** Experienced in coordinating logistics activities to ensure timely delivery of goods and materials. Well-versed in transportation planning, route optimization, and carrier management to minimize costs and enhance efficiency.
- **Inventory Audits and Cycle Count:** Adept at conducting thorough inventory audits and cycle counts to maintain accurate stock levels and identify discrepancies. Experienced in implementing inventory control measures to prevent shrinkage and optimize inventory turnover.
- **Vendor Management:** Skilled in managing vendor relationships and procurement processes to ensure timely and cost effective supply of goods and services. Experienced in vendor selection, negotiation, and performance evaluation to maintain high standards of quality and reliability.

WORK EXPERIENCE

Manager

P & P Logistics

2013-2014

- Monitor operator presence and manpower deployment. Plan and organize daily work, ensuring parts are supplied to the production line according to the Kanban system and FIFO material issuance.
- Prevent downtime or line stoppages due to material shortages by streamlining store picking processes, supplying parts as per the Workbox system, and ensuring timely bin supply. Maintain proper alignment systems in the designated storage areas.
- Oversee equipment maintenance, ensure the sequential supply of specified parts, and uphold housekeeping and discipline standards in the stores. Coordinate with relevant sections and departments to resolve issues.
- Train and develop logistics staff and operators in system usage, and manage stock aging reports.

Manager

Suvidha Enterprises - 3PL Logistics

2008-2013

- Coordinate with internal production teams to ensure material availability and implement customer-suggested plans to meet requirements and achieve customer satisfaction.
- Oversee finished goods packing and dispatch while managing all logistics activities. Select transporters and develop strategies for outbound logistics to ensure timely and safe delivery to customers.
- Manage material movement by maintaining documentation for material issues and movements. Plan inventory for finished goods and oversee storage in the warehouse.
- Plan vehicle requirements on a daily, weekly, and monthly basis, and communicate plans to transporters. Possess in-depth knowledge of local and interstate transportation. Adhere to sourcing policies, inventory targets, and safety stock requirements.
- Handle material movement (inward and outward) and maintain documentation for all material issues and movements. Manage storage, supply, and loading/unloading techniques.
- Conduct HSE training for junior staff, casual workers, and forklift drivers, ensuring adherence to safety practices and company policies.
- Participate actively in the implementation of TWO BIN, KANBAN, and POKA-YOKE systems. Motivate associates to work in teams and solve problems using problem-solving techniques.
- Monitor employee value addition and initiate corrective and preventive actions based on customer feedback and complaints. Conduct training programs and interviews for junior staff and operators.
